# Building Your First Game With ReactJS

By Paran Sonthalia

# About myself

- Have developed multiple iOS Apps
- Put my first app on the App Store when I was 11
- Started teaching when I was 12
- Have been programming since I was 8
- Freshman studying Computer Science at UC Berkeley

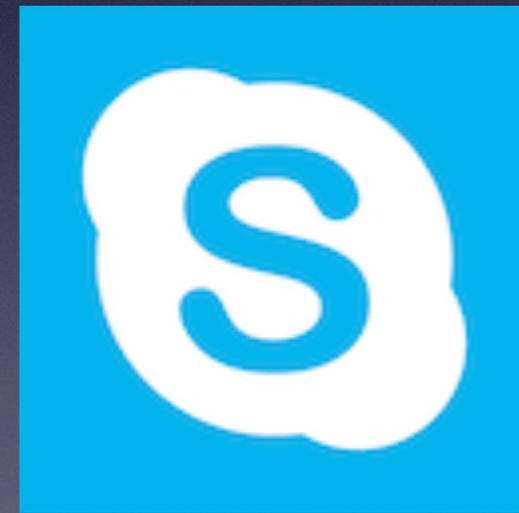

# What is JavaScript?

- A language used mainly in building websites
- Used to make a webpage do more advanced tasks

# What is ReactJS

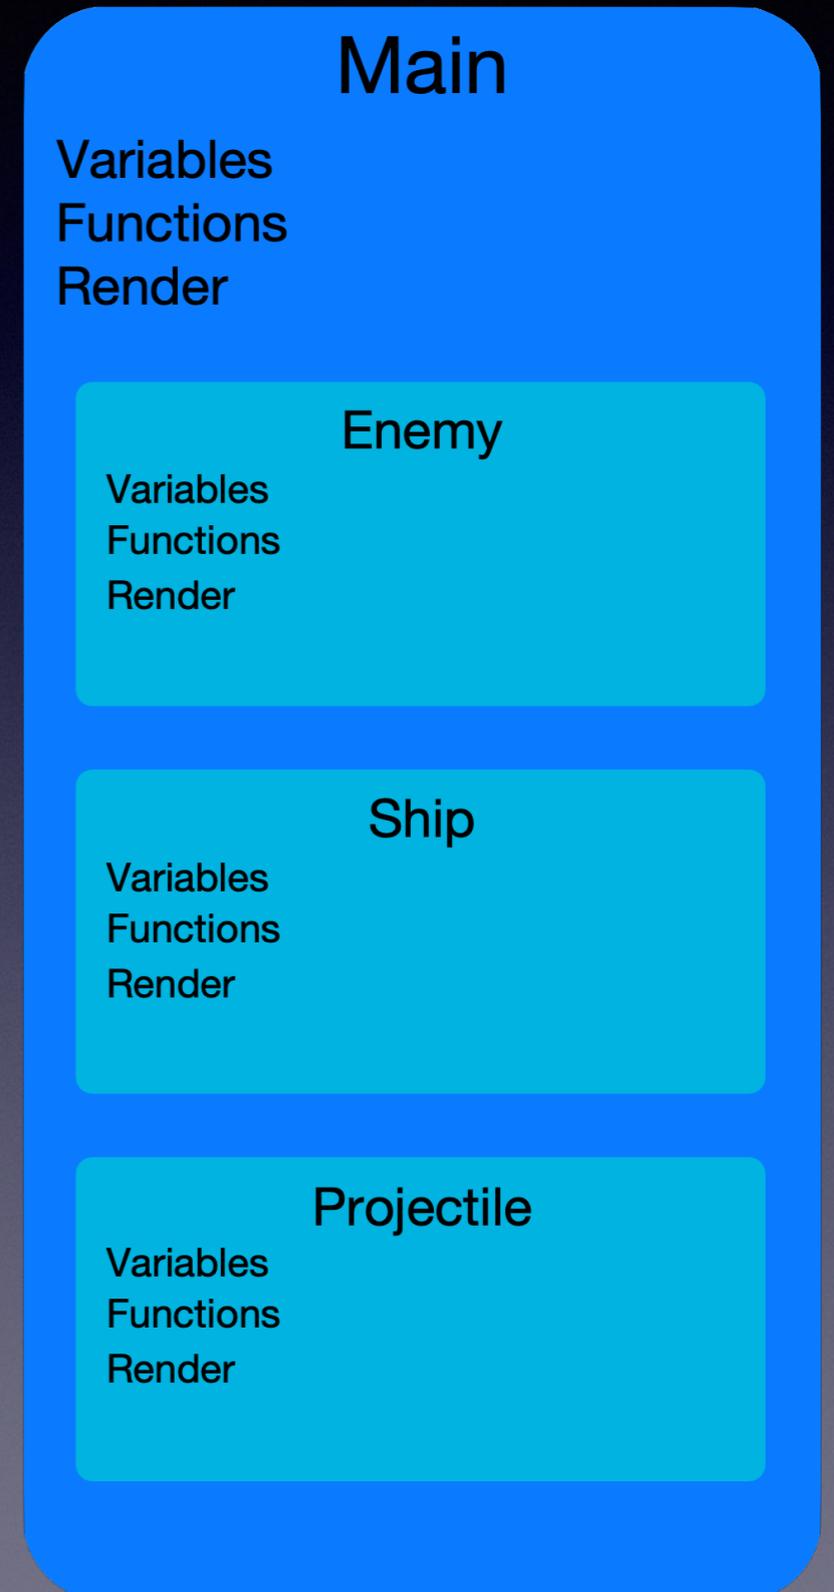

- A framework built on top of JavaScript
- It allows you to insert JavaScript code directly into your HTML code
- Allows you to define custom HTML classes
- If you learn ReactJS, then you can also make mobile apps!

# Where is ReactJS used?

# Basics of ReactJS

- Only one JavaScript file per page
